OUTDOOR LIGHTING

Hello,  
nice to meet you  
we are

**LUTEC**

CONNECTED BY LIGHTING

## one LUTEC, one **lighting** world

We believe outdoor lighting is a unique category with a vast number of specific requirements and challenges. Our aim is to provide creative solutions, innovative designs using quality materials and products.

**At LUTEC we truly focus and comprehensively embrace exterior lighting.**

Our categories include Architectural designs with creative forms of illumination. Functional products, combining tough materials with stylish appeal, Decorative products ranging from period classics to ultra modern shapes. Solar lighting that incorporates the latest trends alongside unique technologies, all to support the ever changing climates around the World

LUTEC now leads the market in connected exterior lighting, with products to enhance the appearance of any exterior, flexible mood lighting, colour changing, dimming and scene setting all controlled via our Apps or remote controls, compatible with tier one Wi - Fi and Bluetooth platforms.

One world, different faces, different segments developed with the same concern of quality and efficiency.

**discover what's new**

# LUTEC SOLAR

## Finally solar lighting is becoming smart!

LUTEC is introducing a breakthrough concept in garden lighting, giving a complete answer to all your uncertainties.

### No electricity consumption - No electric wiring

100% green renewable solar energy. Hassle free and super-fast installation, avoid a costly electric wiring installation in your garden or around your house.

### Splendid light - Versatile fixtures

Wall lights, Flood Lights, Bollard & Spike lights, featuring high lumen light outputs. Enhanced by LUTEC connect dynamic CCT & RGB colour technology.

### Convenient, comfortable & personal

Open the LUTEC connect App, take full control and discover the full smart lighting experience. You can create and program the perfect outdoor atmosphere for every occasion. All night long!

# LUTEC new camera-lights: everything under **control!**

As market initiator, LUTEC is proud to present the 3th generation of the connected camera light range, replacing in full the first 2 generations.

## Brilliant Lights & Superb Recordings

All-round range of decorative and functional camera light fixtures, powered for impressive lighting. High-definition video recording during day time and at night.

## Fast connection and Stable streaming

Thanks to the combination of Bluetooth MESH and WIFI technologies: Quick and convenient start-up process. Secure and solid Audio and Video streaming to your smart phone or tablet, wherever you are.

## Warm Welcome - Safe Home

With the LUTEC connect App, you can control all parameters and adjust all possible settings to assure a personal and comfortable environment for your family and your visitors in and around your home.

+

always **connected** with your home

## there's a new tradition

Cottage flair around your house. LUTEC further extends their successful Tradition series with retrofit solutions.

### Compact and Medium Lanterns

The new traditional series SHIVA, ZAGO, PINE & WEST featuring small coach lanterns solutions and more outspoken medium size models.

### Range extensions

We've added some extra versions to the popular families : KELSEY & FIA. The new pendant, pedestal and 3 light big post models can be used to complete your light plans.

### Vintage style LED filament bulbs

You can apply the newest decorative filament LED bulbs, these lamps are now available in all forms & shades. The connected and tuneable models will facilitate the full control, displaying your personal desire.

A warm amber glow will turn your garden into a cosy and charming surrounding.

# just what I needed

LUTEC is introducing a number of new outdoor items, each of them having some extra characteristics, resulting in a 100% answer to consumers wants and needs for their outdoor lighting installations.

## **LUTEC connect Hub, expanding the connected experience**

The MAINS bollard socket light, with integrated Cloud access box, facilitates away-from-home control for all the devices in your LUTEC connect network.

## **Up & Down lights revisited**

RIDGE and BRUND wall lights, evergreen designs with an actual touch. Suitable for GU10 retrofit spot lights. The ideal solution to create distinctive light patterns around your house.

## **Extreme Climate Proof**

VIDAR and RAN models with a hot galvanised body are perfectly suitable for installation at coastal areas. They come with a 15 years anti-corrosion guaranty.

## **Convenient tuneable lights**

The elegant, flat ceiling light SWEEP comes with an integrated manual switch to select the desired colour temperature. Warm White or Cool White.

## **Matching designs**

The new DOBLO-long wall light, allows you to combine a similar design, available in a Solar version and in an Electrified version.

Control & Adjust your lights  
From your bedroom to your garden

## CCT+RGB whites & colors

## Splendid light

### The way it was meant to be seen

The ambiance of light should fill your home as purely and genuinely as possible. Enhanced by LUTEC Connect dynamic CCT & RGB colour tuning technology. It's about freedom without compromise.

## CCT adjustable whites

## the No Worry Technology

We offer an accessible, simple and reliable solution. No need to be a "geek" to install or use LUTEC connect.

- ✓ **Easy to set**

In 5 minutes, your account is created and you can use your first light
- ✓ **All the main functions without Internet access\***

Thanks to Bluetooth Mesh, it will work without limitation
- ✓ **Fast & stable Bluetooth connection**

You can rely on this technology, it's simple so it's efficient at any time
- ✓ **Up to 100 lights connected**

No limitation, plug in as many lights you need  
No network saturation
- ✓ **Indoor & outdoor control**

Bluetooth MESH allows connection of indoor and outdoor lights.
- ✓ **Range up to 50 meters**

Stay in your sofa peacefully, and control all the lights
- ✓ **Safe and trustful**

No Cloud, no risk, all your personal data will be safe
- ✓ **Home family friendly solution**

The app could be shared to tell all family and a remote control is always near by
- ✓ **Connected or not connected, it's your choice**

All LUTEC connect products work perfectly even if you don't install the app !

# LUTEC SOLAR

## Finally solar lighting becoming smart!

**solar**

**connected**

- ✓ Energy Saving
- ✓ Easy installation  
no wires needed
- ✓ Higher lumen output
- ✓ Long life solar battery

- ✓ Easy to install,  
connect and control
- ✓ Fast & Stable bluetooth  
connection
- ✓ Lights are connected to each  
other via Bluetooth Mesh
- ✓ Range up to 50m
- ✓ Adjustable light settings
- ✓ Control by smart phone  
or motion sensor

### Control and adjust your SOLAR lights

Switch your lights on or off,  
dim your lights, change the  
temperature or the color  
according to your mood.

### High tech Low energy

Easy to control solar lights  
for better efficiency  
and comfort.

### Create Groups For more convenience

Control all your lights at once!  
Easy and fast set up, you can  
add or delete any light from  
the group.

### Manage the battery life

Check the battery level at any  
time. At low battery levels,  
switch easily from ON to PIR  
or OFF mode.

## Control and adjust your SOLAR lights

With the LUTEC connect App you can switch your lights On/Off, dim or change the color temperature easily.

The led color feature available in either the bollard or spike, allows you to create your own personalised garden atmosphere, designing your outdoor space in style with colors or dedicated scenes.

## Create Groups For more convenience

From first detection at your driveway or path create a group which allows all lights to illuminate

Create a group with the Solar connect light through the App. Thanks to Bluetooth MESH the lights can be easily linked and work simultaneously.

## High tech Low energy

Within the application you can select OFF-AUTO-ON mode. Selecting AUTO mode activates the movement sensor, which enables the light to come on only when someone is passing and increases battery life from a single charge.

From the sensor menu you can :

- Activate the detection from near to the sensor to further away
- Set Twilight mode from dusk to dawn
- Choose light reaction time from 10 seconds to 3 minutes
- Constant light : Additional option to set your light output at 20% and also duration after detection from 2 to 8 hours.

## Manage the battery life

This feature enables you to quickly check the battery level.

You can decide to increase or decrease the brightness or switch to AUTO mode or even Off, allowing full user control.

Visit our dedicated website which supports and inspires our consumers with their experience

# karlo

## bollard & spike

The modern garden pathway light KARLO is a beautiful solar lamp that can be used wirelessly anywhere outdoors. The garden path light gets its energy from the solar panel at the head of the fixture. The integrated LEDs shines and reliably illuminate the path. Thanks to the integrated motion detector, light is always available when a person approaches the luminaire. In this way, dark paths from the garage to the house can be illuminated effectively and safely.

# complete lighting solution: green & convenient

  
**Solar Energy,**  
no electricity consumption

  
**No electrical wiring,**  
no connection to the mains

  
**Powerful LED Light**

  
**Full comfort**  
Autonomy all night long

  
**Clever & multiple**  
control options

  
**Easy and fast installation**

  
**Portable**

  
**Integrated solar panel**

  
**Separate Solar panel**

## nice to know

  
DAY  
Solar Energy Battery Energy

  
NIGHT  
Battery Energy Light Output

Longer light or more powerful light

 High efficiency monocrystalline or polycrystalline solarpanel

 LED module with strong light output: 100 lumen up to 500 lumen

 Li-ion rechargeable battery included

 Integrated dusk to dawn sensor, automatic switch to light-on during night

 Weatherproof materials and finishing

## how to choose

 **solar panel Integrated**  
Compact, no extra wiring

 **Separate**  
Higher solar energy capacity

 **orientation of solar panel Fixed**  
The luminaire should be placed in the most optimal position; south orientation

 **Adjustable**  
The panel can be oriented in the most efficient position; south orientation (tilt angle 35° in summer - 65° in winter)

 **orientation of LED light Fixed**  
Diffuse light - Up & down light

 **Adjustable**  
Directional spotlight

 **clever control PIR motion sensor**  
Smart use of the available solar energy  
Always light when somebody is passing

 **High-Medium-Low switch**  
Personalized choice to come to ideal combination of light output and autonomy

 **DIM**  
The Light stays in low brightness all night and turns to high brightness when it detects motion.

# InMotion

Security Sensor Light

## security for your **comFort**

LUTEC presents the InMotion concept offering a complete range of Security Sensor Lights.

The range is featuring, besides the powerful flood lights with one or two heads, a number of very elegant designs which make a perfect match with the architecture of your house.

The 2 stand-alone PIR sensors with multiple controls make the range complete.

## Passive infrared (PIR) motion sensor

### How does it work?

A PIR sensor detects changes in the amount of infrared radiation and converts this changes into a switch-on signal.

When a person makes a movement within the detection reach, the sensor will detect a difference in infrared radiation in between the person's body and the environment.

### Comfortable detection area

The detection area is a combination of the reach in distance and angle. An adjustable sensor can be tilted and/or turned and gives you full freedom.

### Your personal settings

#### Time setting

As from the moment the sensor detects a movement the light stay on from 10 seconds upon 8 minutes according your preference.

#### Twilight setting

The environment brightness can be adjusted according your selection from night (10 lux) to daylight. In this way the light will switch into the "ON" position according the selected outside light level and not during the day.

#### Distance setting

You can limit the detection distance in accordance with the desired detection area. In this way you can avoid a movement detection outside your private grounds.

### For your convenience

#### Dusk to dawn

Automatic light on switching as soon it's dark outside

#### Ambient Light

Light stays on all night long in a gentle ambient light, after movement detection the light switches on a powerful light beam.

#### Double sensor

Assures you a full detection not only frontal but also underneath the luminaire close to the wall.

#### Test mode

You can define the perfect detection area during installation in daylight situation

### How to choose?

Check in a few steps which InMotion Security Sensor Light suits the best for your home situation.

### BASED ON SENSOR DETECTION REACH

### BASED ON LUMINAIRE CHARACTERISTICS

# introducing our company

## 50 years of experience

### The beginnings of a lighting company

Originally set up as a national aluminium die-cast factory, we gained our first experience of outdoor lighting by producing bulkhead lights & classical garden lanterns. Our quality standards have always met international standards and the first export shipment was made in 1996. The new factory in Yuyao became operational in 2001, concentrating on modern garden & professional lighting resulting from a booming international demand. From 2009 a close collaboration with the Design(Pool) had two objectives; to create a stronger offer for the ODM market and to develop a platform for our own brand of lighting. LUTEC was launched in 2010, focusing on architectural LED lighting and the introduction Solar Energy Products. The success of the company resulted in the opening of a second production facility in 2012, fully devoted to future developments in design and new technologies.

Whilst it is true, LUTEC is a young brand, it is built on a strong manufacturing background ( 40 years of experience) and a solid reputation of technological expertise. Manufacturing involves imagination and efficiency.

### Why we decided to establish a brand?

The brand gives us a needed visibility. The brand allows us to anticipate the market, to make our own choices related to trends and to make developments such as we perceive them through our partners in different countries. Connected by lighting underlines our intention to develop products in accordance with the final consumers, through all our network and distribution channels. Having become a major player in the lighting field, our main objective is to consolidate our offer through creativity, our designs evolve and involve the highest level of quality and services.

### Nowadays Lighting is both essential and magic.

The challenge of lighting market is to create products which are a balance between the shape, impact and attractiveness however, they must also provide real functional values. The LED revolution has completely changed the game, giving many new opportunities. Added to this we must not only continue to offer the latest technical innovations but also anticipate and provoke them, especially with solar energy and smart lighting controls. To serve our objectives, we have continued to expand our international network and organisation: with new central warehouses in Belgium and China, establishing partners in many new countries allowing us to continue building our corporate identity and providing our partners with unique product support and marketing.

### Future is already here Support the users

Today we are all surrounded by the interactive and connected World. For many reasons it is evident that the lighting market must also embrace this new internet age. The need to control our lighting, at will, from afar and to suit our environment is a must have feature. Temperature, color, dimming, activity sensors and timing controls are the norm. Programmable solutions for energy saving, interactivity between multiple light points or installations are becoming standard. Security options with camera vision, live video and recording are no longer a futuristic dream as LUTEC products can perform all of the above.

# welcome to the lutec center

## connected by lighting

The LUTEC centre is in our HQ in Yuyao and located on our production site, it is an International meeting venue where new concepts, innovation & strategies are studied then created and shared, with our partners.

We provide an expert platform in design, sales and services. We have the will to show and experiment different approaches creating choices for the short or medium terms. Staying close to our customers, which by extension also means the final consumers, allows the right design solutions to be found. Our team is trained to be proactive and reactive. The key to realise a win-win product is to always explore the possibilities, look outside the box to find the best solution.

In our view innovation is always closely linked to a right level of realization.

## design & engineering

design, engineering & manufacturing, all interactive.

One of the main decision we have taken in the LUTEC organisation is to break down the walls between of each department to improve product strategy. This brings a culture of flowing communication between the services where everybody has a positive role to play in all projects. It works because we consider that we are all concerned in the success of a product.

We all know development is complex with many obstacles to overcome however by working together helps our team to aim for the perfect solution as smoothly as possible. Knowledge is shared at all levels. Creativity, marketing, engineering, production, and sales are all one, this method improves time to market significantly.

## warehousing & transport

global logistic footprint assuring availability & proximity.

Unlike many manufacturers in this sector, LUTEC keep significant levels of completed stock which is packaged and ready to ship. This is in addition to our stock process flow, feeding our satellite distribution centres in Europe and elsewhere around the World. Our aim is to reduce the lead time wherever possible on key products.

**CCW**  
China Central  
Warehouse  
Yuyao - China

**ECW**  
European Central  
Warehouse  
Bornem - Belgium

Since 2014, the European Central Warehouse is fully operational. This warehouse located in Belgium, centrally situated in Europe with an average lead time of 7 days for most shipments within Europe, LUTEC products are always within reasonable reach.

We offer different transport options: direct shipment, cross docking or pick-up, in co-operation with each territory. The ECW product portfolio now contains 350 sku's.

Now, we've also the possibility to assure different value adding trade marketing services in the ECW.

# LUTEC quality

As a global supplier, our products are fully compliant with all relevant technical & quality requirements of the different regions in the world.

All LUTEC LED products benefit from a 5-years functional warranty. For the SOLAR range we apply a standard 2-years operational warranty.

Subject to conditions, please see our website.  
[www.lutec.com/warranty](http://www.lutec.com/warranty)

## Integrated LED Light-engines

In the majority of our ranges we use dedicated LED light engines. The LUTEC in-house engineering/production departments only use primary component suppliers, constantly improving the performance of the total LED product, resulting in a higher lumen/watt ratio as well as increasing levels of lumen/monetary ratio.

**Low Energy Cost:** LUTEC products offer at least an 80% saving compared to traditional sources  
**Long Lifetime:** up to 20.000 hours

LUTEC LED-light engines featuring the most appropriate characteristics in order to give the best result for all your outdoor applications.

- Lumen Maintenance: 100% LM-80 test report
- Color deviation: 100% under 5-step MacAdam ellipse
- ERP compliant

The LED driver is the heart of the LED module and is the main influencer of the life-time. LUTEC develops these drivers to the specification of the product for best performance. The production of the SMD's used in the LUTEC-drivers is done in-house in our approved SMT assembly lines. All drivers are compliant to all relevant standard and regulations. UL-GS-EMC-FCC-ERP.

# new ERP regulations 2021

## New EU regulation

As from September 2021 the new EU regulation concerning Energy Efficiency for Lighting products replaces the previous EU-regulation no 874/2012.

It involves New Energy Labelling regulations (EU) 2019/2015 and New Ecodesign requirements for light sources. (EU) 2019/2020.

Overall objective of this updated regulation is to protect environment, improve durability of lighting products and strengthen consumer protection.

## LUTEC Outdoor Portfolio

All LUTEC outdoor luminaires within the scope of the new EU-regulation have been updated and tested in 2021 in order to become fully compliant to the new regulations. This has resulted in the attribution of a new classification with Energy Efficiency Classes in between A & G.

## "Containing Products" Classification

The complete range of LUTEC luminaires has been classified as Containing Products with a removable and non-replaceable LED-module. AS a result we have tested the separate Lighting LED-Module as the Light Source and so the new Energy Efficiency Class is related to the LED-Module and not to the complete luminaire as such.

NON-REPLACEABLE LIGHT SOURCE

## LED Module - Energy Efficiency Class

In order to make it clear that the test results are related to the LED Module, a specific EEL label was created with a "M" (Module) indication behind the item nr.

This EEL label can't be shown on the packaging of the complete Outdoor Luminaire. In the Instruction Manual we indicated the Energy Class of the concerned light Source (= LED Module)

## EPREL Database

Consumers can access the database by scanning the QR code featured on the new energy labels. The EPREL database offers detailed information of all registered LUTEC products.

## Available information on [www.lutec.com](http://www.lutec.com)

On our LUTEC website all related information is available for consultation and easy download of specific documents:

- Energy Label
- Instruction Manual
- Product Information sheet (with test results)
- Light Source Remove instructions

## Catalogue info

On each product page in this catalogue we've mentioned the Energy Efficiency Class of the concerned LED Module, with a letter symbol.

# sustainable & environmental vision

LUTEC constantly strives to reduce the environmental impact. It's our intention to become step by step a carbon neutral company, embracing sustainable choices.

## Durable Products

- LUTEC outdoor luminaires are made from durable materials, fully weatherproof, to last for many years.
- Thanks to the evergreen designs most of our customers will enjoy the LUTEC outdoor lights for many years around their homes, terraces and gardens.

## Sustainable Resources

- We're using high density die-cast aluminium, durable synthetics glass, paper and carton as main materials in our LUTEC luminaires.
- These materials can be recycled in a convenient and economic way. This in existing recycle centres all over the served markets.

## Sustainable Functions & Features

- LED Lights : consume 80% less energy vs traditional light sources
- SENSOR Lights : consume energy only when you need the light
- CONNECTED Lights : smart use & control of the lights, results in energy saving up to 90%

## SOLAR Lights : 100 % green energy

- Focus on development of efficient and smart Solar luminaires
- High light output in relation with required autonomy
- Last year, more than 400 thousand homes were equipped with a new LUTEC Solar light.

**LUTEC**  
SOLAR

## Sustainable Product Development

- Use of LED integrated light modules resulting in an overall longer life cycle of the luminaire, thanks to optimal heat management.
- Use of retrofit solutions, giving consumers the possibility to change the light bulbs in the LUTEC luminaires into more advanced and energy saving versions in the future.
- Research and Development of replaceable LED engines as fully demountable components leading to a truly cradle to cradle approach.

## Zero-Plastic Packaging

- LUTEC has started the complete ban of plastic bags in their consumer packaging as from mid 2021. This means that for all new luminaires put on the markets in 2022, we use only carton and paper.
- By the end of 2022, 60% of all unit-boxes shipped out from our factory will be plastic bags free.

## Responsible Production & Operations

- On the roofs of UTEC Ningbo production facilities in China we've installed recently high efficiency solar panels.
- This with a total solar panel surface of 6000m<sup>2</sup> resulting in a green energy capacity of 48.630kWh saving 30% of our annual energy consumption.

# materials & Finishes

LUTEC exterior products are produced using high quality materials and finishes with excellent weather protection properties as well as mechanical strength to ensure a long lifetime.

Heavy duty die-cast Aluminum (ADC 12) with a thickness of 2mm, is in most cases the preferred material, our process ensure no air holes. The LUTEC In-house fully automatic powder-coating & water painting installation provides excellent protection against corrosion.

LUTEC benefits from an in-house tooling workshop for both aluminum and synthetic components. This facility provides us with high quality production especially where premium Stainless Steel is used, typically in ground recessed spotlights using grade 304 & 316 steel. For the wall & bollards: 201 & 202 is utilised with an electrophoretic paint, resulting in an additional layer of protection.

Different kind of durable synthetics, depending on the application and form factors. For the fixtures: in most cases ABS, this is a strong, light-weighted material and can be used under low and high outdoor temperatures. For the diffusers: the impact proof and very resistant PC (polycarbonate) is used in opal or transparent version. Also clear glass, tempered glass and opal or clear PMMA (plexi-glass) are common in our designs.

## IP rating table

Protection against solids	Protection against liquids
0 Not Protected	0 Not Protected
1 Protected against Solid Objects greater than 50mm	1 Protected against Dripping Water
2 Protected against Solid Objects greater than 12mm	2 Protected against Dripping Water when tilted to 15°
3 Protected against Solid Objects greater than 2.5mm	3 Protected against Spraying Water
4 Protected against Solid Objects greater than 1mm	4 Protected against Splashing Water
5 Dust Protected	5 Protected against Water Jets
6 Dust Tight	6 Protected against Heavy Seas
	7 Protected against the effects of Immersion
	8 Protected against Submersion

The LUTEC Outdoor fixture comply to the International standards concerning Ingress Protection. All articles have a minimum IP44 rate. For some specific applications (Ex. in ground recessed spots) the protection rate goes up to IP67.

## Color Indication

- Dark Grey
- Matt Black
- Silver Grey
- Bronze
- S/S
- Chrome
- Galvanised
- Wood Look

- Matt Rust

# mounting, installation & maintenance

## Instruction Manual

LUTEC pays a lot of attention to a user friendly and effective yet simple instructions, we strive to find time saving methods of installation using uniquely designed interfaces where possible. Every LUTEC Outdoor fixture has a clear instruction manual in the unit box and this manual can also be downloaded from our website. Clear explanations in 8 European languages.

## Service network

Our service network is available on global level through our LUTEC Partners. Contact details: [www.lutec.com/services/global-network](http://www.lutec.com/services/global-network)

# LUTEC brand identity

## packaging

The LUTEC corporate identity has been revamped in line with our evolving brand values. New trade support tools and POS have been created to support our products and our customers providing an integrated selling solution, all of which adds value and distinguishes the LUTEC offer from our competitors.

# LUTEC brand identity

## rich content

We're constantly creating new communication materials to support and improve the presentation of LUTEC products, allowing ease of selection. All support materials are accessible through our refreshed website [www.lutec.com](http://www.lutec.com). Where you can find the LUTEC database with all kind of "rich content": product photos, Lifestyle photo's, Tutorials, Inspirational video's, Flash-Intro video's, Unpacking experiences, etc.

All support materials may be used for numerous marketing initiatives such as driving traffic to your own landing pages on your websites via social media. Content can be created in a convenient and attractive way resulting dynamic information and content to inform and inspire the customers about the LUTEC products.

Recently we introduced the fully refreshed packaging, being applied to our complete portfolio. We believe the new look of the new packaging is fresh, vivid and in tune with our style of products. The product is always the hero with an inspiring photography. The refreshed LUTEC logo is visible from all sides of the packaging which together with the green banner this will further improve the brand recognition.

As from this year, the LUTEC SOLAR and LUTEC SECURITY unit-box graphics are launched in the market for the newly introduced LUTEC connect Solar and LUTEC connect Camera ranges. By means of a distinctive colour indication, Orange for Solar & Red for Security, the consumers will easily recognize the difference with the standard LUTEC outdoor ranges.
